Abbreviations: Chr., Chromosome; Ref, Reference allele; Var, Variant allele.

Table S7. Cohorts used for human height GWAS studies

	Reference	Year	PMID number	Population	Cohorts
1	Weedon MN et al., 2008	2008	18391952	European	1. The type 2 diabetes (WTCCC-T2D); 2. Hypertension (WTCCC-HT); 3. coronary artery (WTCCC-CAD) disease branches; 4. The national blood service (WTCCC-UKBS); 5. The Diabetes Genetics Initiative (DGI); 6. The EPIC Obesity; 7. The UKT2D GCC, EFSOCH (Exeter Family Study of Childhood Health); 8. The MRC British Genetics of Hypertension (BRIGHT); 9. The CoLaus.
2	Gudbjartsson DF et al., 2008	2008	18391951	European	1. Icelanders with obesity and cancer; 2. Dutch individuals with bladder cancer; 3. Subjects with a premature coronary disease event before 60 years of age; 4. The Danish Inter99 cohort is a population-based sample of 30- to 60-year-old individuals living in the greater Copenhagen area.
3	Cho YS et al., 2009	2009	19396169	Korean	1. The rural Ansung and urban Ansan cohorts with aged 40 to 69; 2. The Health2 cohort from the Wonju, Pyeong Chang, Gangneung, Geumsan, and Naju regional cohorts in Korea.
4	Soranzo N et al., 2009	2009	19343178	European	1. The TwinsUK cohort with adult twin British registry; 2. The Rotterdam Study (RS) with elderly individuals (age 55 years and over); 3. The British 1958 Birth Cohort with individuals born within a single week in 1958, and followed periodically from birth to age 44–45 years; 4. The European Prospective Investigation into Cancer and Nutrition study (EPIC-Norfolk) with aged between 40 and 79 years, resident in Norfolk, UK; 5. The Chingford Study with residents in North London; 6. Chuvasha with Caucasian Finno-Ugric speaking population residing in the Chuvasha and Bashkortostan autonomous regions of the Russian Federation; 7. The Cambridge BioResource (CBR) with pseudo-anonymised DNA samples.

5	Lango Allen H et al., 2010	2010	20881960	European	1. The primary meta-analysis (Stage 1) included 46 GWA studies of 133,653 individuals; 2. The in silico follow up (Stage 2) included 15 studies of 50,074 individuals.
6	Kim JJ et al., 2010	2010	19893584	Korean	1. The Ansung and Ansan cohorts in the Gyeonggi Province of South Korea.
7	Okada Y et al., 2010	2010	20189936	Japanese	1. Japanese subjects from 23 disease sample groups and a healthy control group.
8	Yang J et al., 2012	2012	22426310	European	1. The GIANT Consortium
9	Wood AR et al., 2014	2014	25282103	European	1. 79 GWAS.
10	He M et al., 2015	2015	25429064	European, Asian	1. the 11 GWAS with East Asian ancestry in Stage 1; 2. East Asian ancestry from five additional GWAS.
11	Chan Y et al., 2015	2015	25865494	Various	1. Atherosclerosis Risk in Communities; 2. Cardiovascular Health Study; 3. Coronary Artery Risk Development in Young Adults; 4. Framingham Heart Study; 5. 1958 British Birth cohort; 6. Avon Longitudinal Study of Parents and Children.

Figure S1

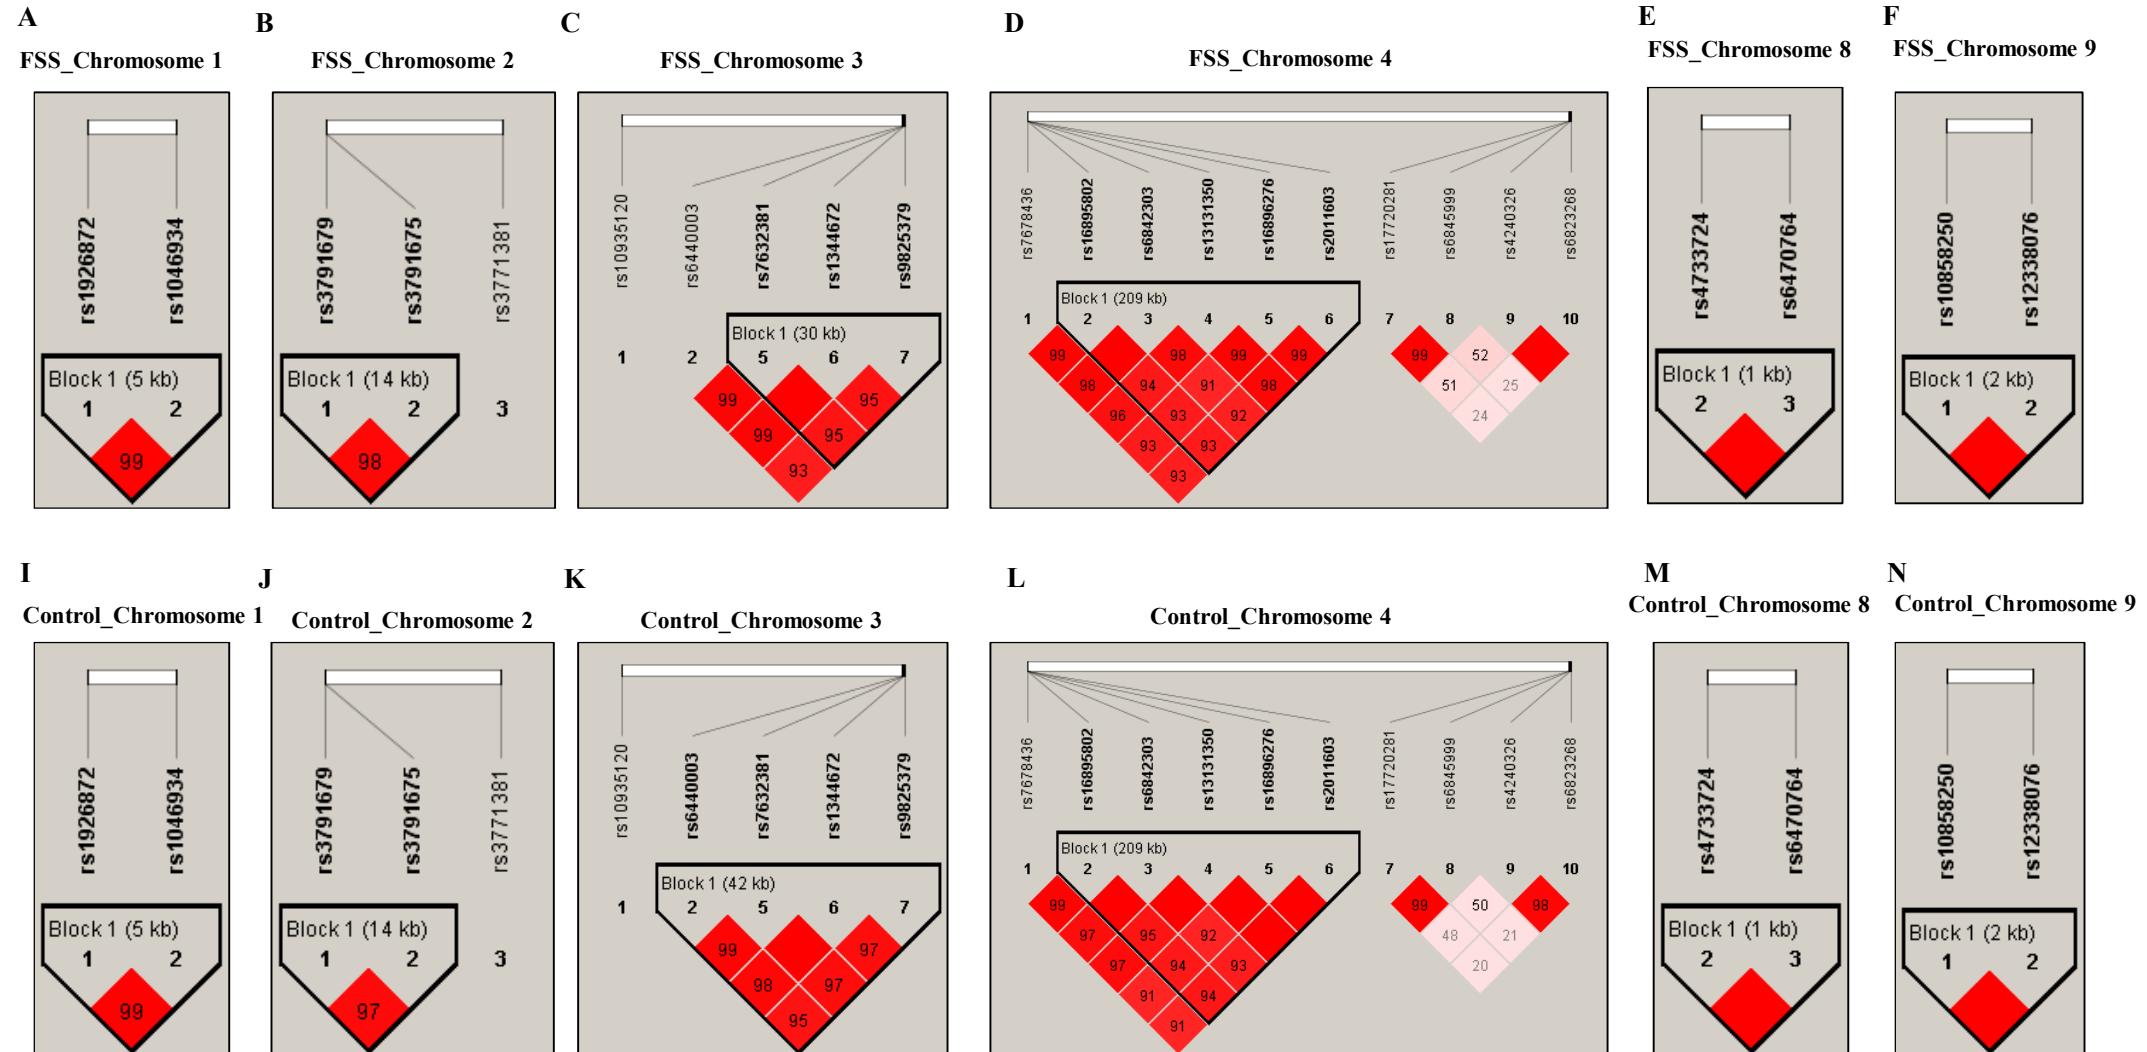

Figure S1

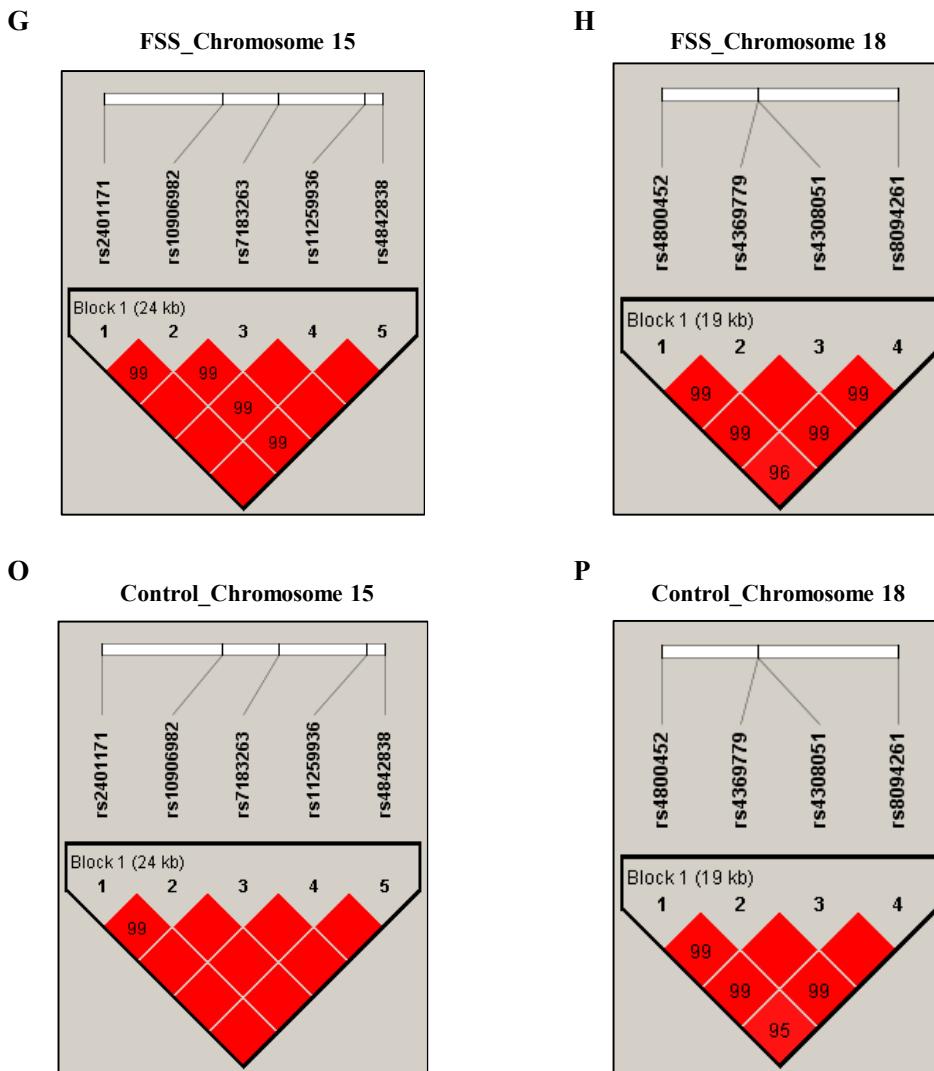

Figure S1. Results of a single-nucleotide polymorphism (SNP) association study of the genetic SNPs identified from GWAS studies of human height in FSS and healthy individuals from the general population of Taiwan who were of Han Chinese ethnic background. Haplotype blocks with different chromosome positions for the 978 FSS cases (A-H) and 1,129 control subjects (I-P) constructed according to the confidence interval approach using Haplovew software^{50, 51, 52}. Red indicates linkage disequilibrium ($D' = 1$, logarithm of odds [LOD] ≥ 2); pink indicate evidence of recombination ($D' < 1$, LOD < 2).

Figure S2

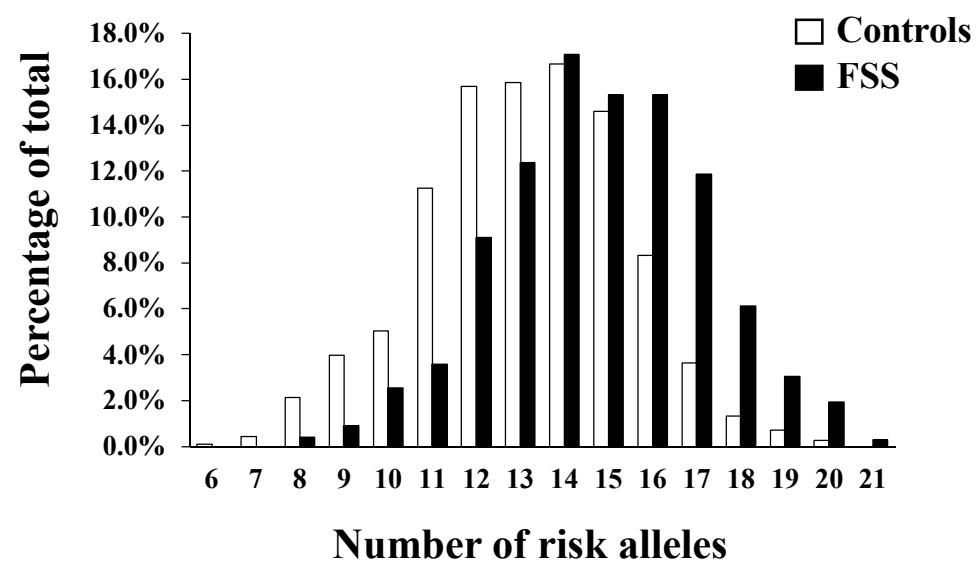

Figure S2. Distribution of the number of risk alleles.

Figure S3

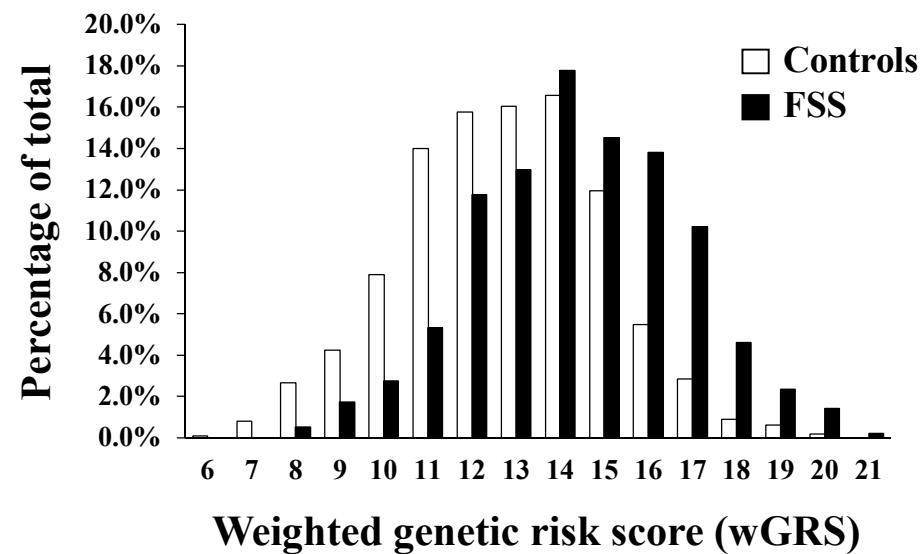

Figure S3. Distribution of the number of weighted genetic risk score.

Figure S4

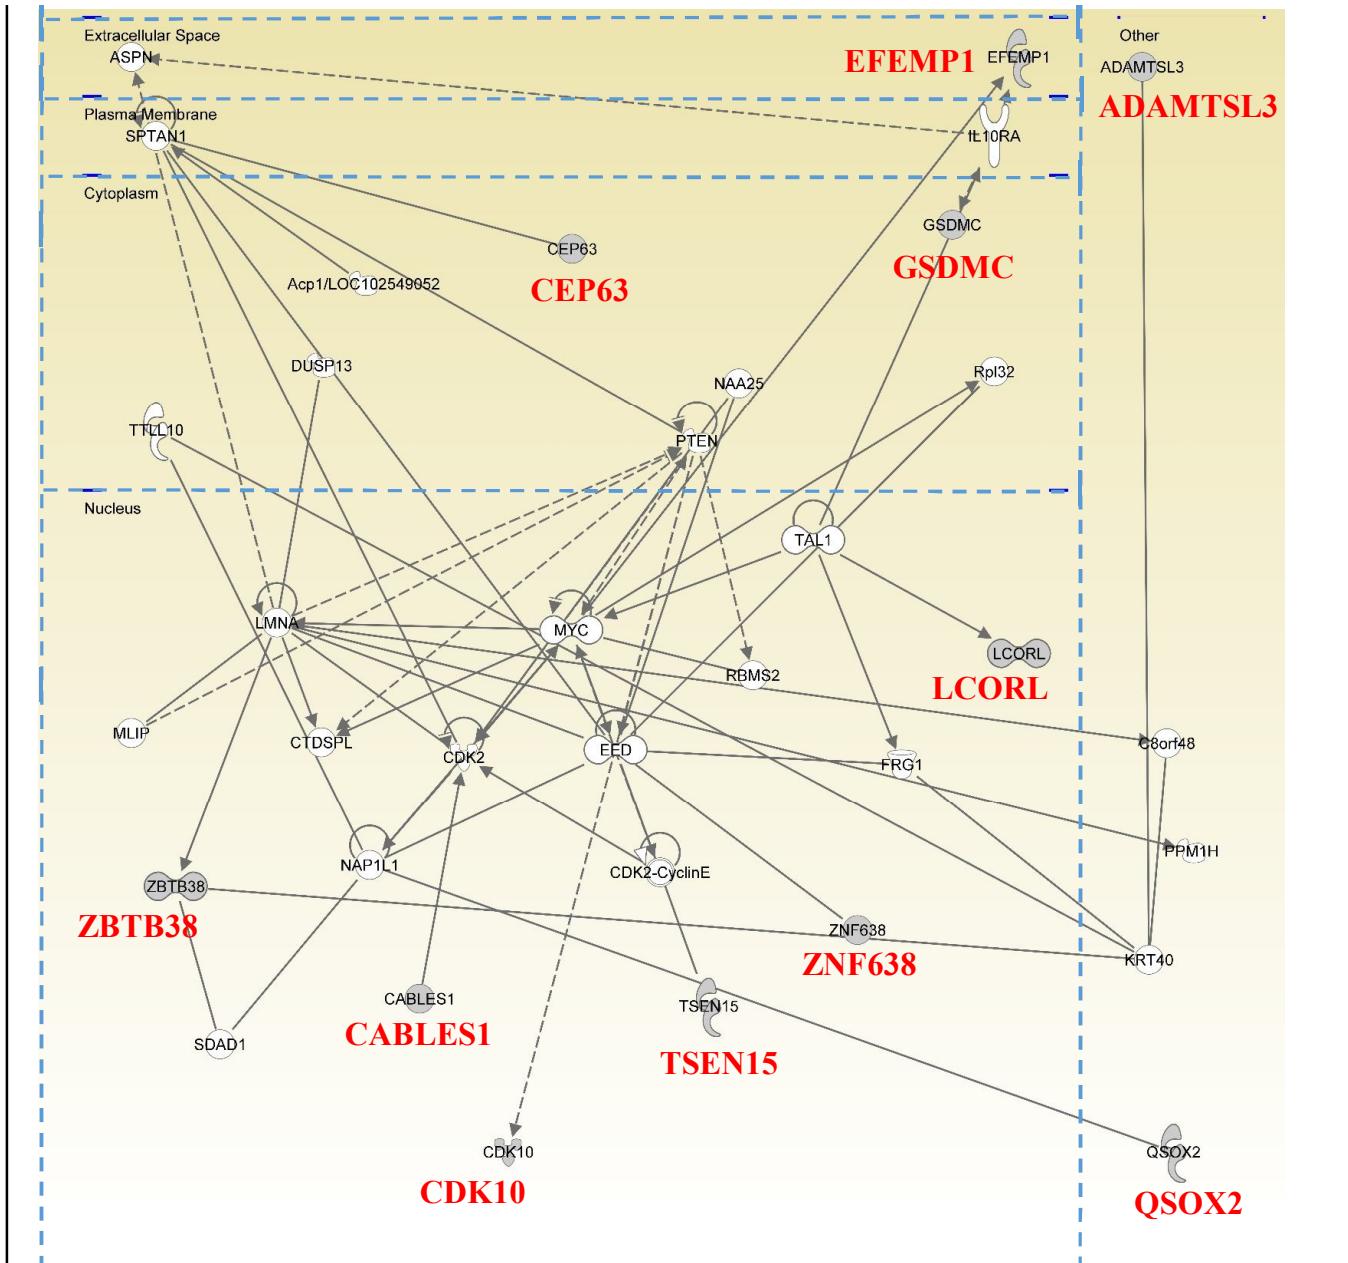

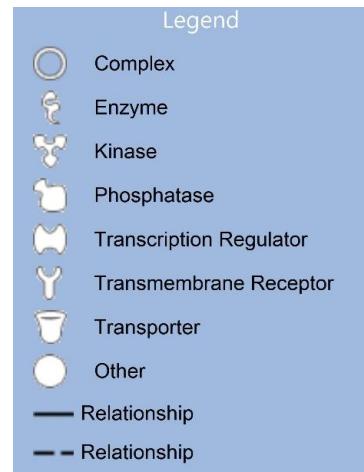

Figure S4. Putative gene network derived from Ingenuity Pathway Analysis (IPA) software. IPA network analysis identified a single cluster of 35 genes that includes 11 associated genes discovered in this study. The lines between genes represent known interactions (solid lines represent direct interactions; dashed lines represent indirect interactions). Each gene is displayed using various shapes that represent the functional class of the gene product, as indicated in the legend.
